

Plymouth High School for Girls

"For life, not school, we learn"

3rd July 2020

Dear Students, Parents and Carers,

Re: Science curriculum review following the school closure

I am writing to reassure students, parents and carers that the Science Department has completed a detailed review of our curriculum in order to reduce the impacts of the school's closure this academic year. Our students are ambitious and many will wonder how this might affect their future examinations.

We have found key points in the forthcoming academic years where we can sensibly review and build upon the concepts students have learned at home. This, we hope, will improve confidence and exam preparedness in the future.

A summary of our work is linked below for your interest. Whilst it is not exhaustive, it itemises a number of opportunities we will exploit so that our students can achieve their potential.

Yours faithfully,

Mr D Britz-Colwill

Head of Science
