

www.Sims-parent.co.uk

- Siblings at different schools can be on the same app but still use the activation code given for each child and log in using log in details already set up
- If you are already registered/have registered in the past you will not have received a new invite.
- If you cannot remember your log in details I can unregister you and resend them, unless you registered for a sibling at another school first.
- You just need the activation code/email and your child DOB then you can choose how you log in in the future
- Each parent needs to have the app to amend their own contact details
- Do not use sims ID login option
- Choose from an existing account that you have from these and use your log in details. If you do not have any of these accounts already the easiest thing is set up a Gmail account and use this.

-
- Once in the app please do not change student phone number or email
- Each parent can only amend their own contact details.
- A parent can only amend their child's details if they live at the same address
