

14<sup>th</sup> October 2021

Dear Parent/Guardian,

On **Saturday 19<sup>th</sup> February 2022** we have the fantastic opportunity to, once again, host Med Soc Live (previously Operating Theatre Live) in school. For the first time, this event will be open to anyone over the age of 14/Year 9 both internally to Plymouth High School students and family, as well as externally to the public/other schools.

The event operates in such a way that it appeals to students considering both medicine, dentistry and veterinary science as well as those considering: nursing, midwifery, paramedic science, occupational therapy, pharmacology, biomedical science and sport science or anyone who has an overall interest in anatomy and biology. This event gives people the chance to complete dissections beyond the scope of the curriculums currently studied at either GCSE or A-level Science. Students who attended the previous event found it thoroughly enjoyable, insightful and a fantastic experience to talk about upon application for future careers or courses.

The event is delivered by the award-winning human anatomist Samuel Piri who has featured on the BBC, The Discovery Channel and Medicplayer. At the event, Sam and his team will provide the opportunity for students to participate in the dissection of real organ specimens include a head and brain, lungs and heart as well as a digestive tract showcasing the stomach, liver, gallbladder, pancreas and intestines. The day is rigorously academic with students receiving an award-winning insight into how the body works and the challenges faced by the next generation of medical professionals. All of the content is carefully matched to the main GCSE, A-level & BTEC specifications and is relevant to the study students are undertaking in the classroom.

The full day (10am – 4.30pm) will be split into 8 topics, tickets can be purchased to cover either topic 1-4 (10am-2pm) or 1-8 (10-4.30pm). The ticket price for the shortened day is £69 and the full day at £99.

To book tickets please use the following link (please note tickets are booked directly with the Med-Soc company and are no monies are being taken by school) [Med-soc | Plymouth | MEDICPLAYER LIVE](#).

Places are limited, are already on sale to the general public and soon to be advertised to the surrounding schools. If your child or you are interested in attending please

sign up to avoid disappointment. Should you need further information please feel free to get in touch with myself or Med-Soc directly through their website. For your interest I have included a few images from previous events held by Med-Soc.
